MCITP Overview

The MCITP Windows Server 2008 enables professionals to target specific technologies and distinguish themselves by demonstrating in-depth knowledge and expertise in their specialized technologies.

By earning MCITP: Server Administrator and MCITP: Enterprise Administrator certifications, you will be able to demonstrate skills in Windows infrastructure design and a readiness to excel in Windows Server 2008. Server Administrators and Enterprise Administrators are recognized among their peers and managers as leaders in the day-to-day operations management of Windows Server 2008.

Earning the MCITP: Server and Enterprise Administrator certifications will enable you to stand out and distinguish you as an IT professional committed to excellence in working with Windows Server 2008.

Demonstrate and communicate your ability to take system-wide ownership of Windows Server 2008 administration, and increase your organization's return on technology investment, by earning the MCITP: Server Administrator certification.
